EXPERIENCE

John Manlove Marketing & Communications

Front End Web Developer
March 2017 - Present

Worked in a Mac environment with HTML, CSS, JavaScript, PHP and WordPress. Consulted with third-party about setting up a credit card processing form as well as integrating and testing their service.

Testmasters

Teacher, Tutor
July 2014 - Present

Taught Critical Reading, Multiple Choice & Essay Writing (SAT, ACT & ISEE). Advised students on the advantages of organizing writing as recommended by the curriculum, best practices for reading, learning vocabulary, grammar, preparing for the essay, and what they can expect from graders.

CMedEd

Web Designer
November 2016 - Jan 2017

Worked with HTML and CSS to set up and standardize pages in WordPress for this start-up. Also worked with Adobe Photoshop to edit images according to brand standards.

IFMA

Web Designer
May 2016 - August 2016

Worked in a Windows environment with HTML, CSS3, JavaScript, PHP, and Adobe CS to set up sites in WordPress. Redesigned parent theme. Managed child themes, content, and plugins. Followed style guide for layout and content. Consulted with members about needs to deliver customized sites. Communicated with managers, graphic designer, and member liaisons to finish deliverables by deadlines.

General Assembly

Web Developer
December 2015 - April 2016

Made a series of applications from scratch in a Mac environment. Hosted them with Heroku (cloud) and tracked versions with Github. These projects included: an informational site that consumes API data and uses Web Storage and JavaScript/jQuery to render the UI, a survey application that uses Node, MongoDB, and NoSQL to store user input and JavaScript/jQuery to render the UI, a recipe recommendation application that uses Ruby on Rails and PostgreSQL to store user input and JavaScript to render the UI and handle user actions, and a to-do list application that uses Angular for SPA organization and MongoDB to store user input.

LRNGO, Inc.

Web Development Intern
August 2014 - May 2015

Worked for this start-up with HTML5, CSS3, JavaScript, PHP, and Zend framework in a Mac environment. Used BitBucket for version control. Wrote and consumed an API. Wrote and fixed frond-end code and back-end code for database queries, models and controllers. Wrote out custom interactive features with JavaScript and HTML5. Also did visual design (color, layout, spacing, typography, image choice) and wrote front-end code for various landing pages focused on visitor conversion. Managed email marketing campaigns, wrote a technical brief about the process for future users, and did content writing.

EDUCATION

Duke University

Bachelor of Arts in Literature
and Visual Arts

Houston Community College

Continuing Education (CompTIA A+
Certificate)

General Assembly
