NON-TECHNICAL

Research, Graphic Design, Visual Design, Wireframing, Email Marketing, Agile development, Content Writing, Technical Writing, Public Speaking, Photography, Video & Film Production, Visual Arts, Russian (fluent), Spanish (limited proficiency)

EXPERIENCE

Internetbar.org Institute

Graphic Design Intern
June 2017 - Present

Worked with Creative Cloud and Behance to do research and iterate on new logos. Used Adobe Experience Design to make full-site UX/UI wireframe and redesign site for launch by deadline. Managed design assets and communicated with team to make sure designs were implemented.

Testmasters

Teacher, Tutor
July 2014 - Present

Taught Critical Reading, Multiple Choice & Essay Writing (SAT, ACT & ISEE). Advised students on the advantages of organizing writing as recommended by the curriculum, best practices for reading, learning vocabulary, grammar, preparing for essay writing, and what they can expect from graders.

John Manlove Marketing

Front End Developer
March 2017 (project)

Worked in a Mac environment with HTML, CSS, JavaScript, PHP, WordPress, and Dreamweaver. Consulted with a third party about setting up a credit card processing form as well as integrating and testing their service.

CMedEd

Web Designer (contract)
November 2016 - Jan 2017

Worked with HTML and CSS to set up and standardize pages in WordPress for this start-up. Also worked with Adobe Photoshop to edit images according to brand standards.

IFMA

Web Designer (contract)
May 2016 - August 2016

Worked in a Windows environment with HTML, CSS3, JavaScript, PHP, and Adobe CS to set up sites in WordPress. Redesigned parent theme. Managed child themes, content, and plugins. Followed style guide for layout and content. Consulted with members about needs to deliver customized sites. Communicated with managers, graphic designer, and member liaisons to finish deliverables by deadlines.

General Assembly

Web Developer
December 2015 - April 2016

Made a series of applications from scratch in a Mac environment. Hosted them with Heroku (cloud) and tracked versions with Github. These projects included: an informational site that consumes API data and uses Web Storage and JavaScript/jQuery to render the UI; a survey application that uses Node, MongoDB, and NoSQL to store user input and JavaScript/jQuery to render the UI; a recipe recommendation application that uses Ruby on Rails and PostgreSQL to store user input and JavaScript to render the UI and handle user actions; and a to-do list application that uses Angular for SPA organization and MongoDB to store user input.

LRNGO, Inc.

Web Development Intern
August 2014 - May 2015

Worked for this start-up with HTML5, CSS3, JavaScript, PHP, and Zend framework in a Mac environment. Used BitBucket for version control. Wrote and consumed an API. Wrote and fixed frond-end code and back-end code for database queries, models and controllers. Wrote out custom interactive features with JavaScript and HTML5. Also did visual design (color, layout, spacing, typography, image choice) and wrote front-end code for various landing pages focused on visitor conversion. Managed email marketing campaigns, wrote a technical brief about the process for future users, and did content writing.

EDUCATION

Duke University

Bachelor of Arts in Literature and Visual Arts

Houston Community College

Continuing Education (CompTIA A+ Certificate)

General Assembly

Web Development Immersive,
Intro to UX Design, Intro to Visual Design
